PROFESSIONAL SUMMARY

Mobile Application Developer with 6+ years of experience and 8+ successful App Store releases, specializing in building scalable, high-performance, and user-centric applications. Experienced in delivering end-to-end iOS and Android solutions across diverse business domains.

SKILLS & INTEREST

Technical Skills: Swift, SwiftUI, UIKit, Objective-C, Swift Concurrency (async/await), GCD, Combine, Multithreading, MVVM, Clean Architecture, OOP, SOLID Principles, Design Patterns, Dependency Injection, REST APIs, API Integration, URLSession, Alamofire, OAuth 2.0, JWT, Core Data, Realm, Firebase, Cloud Firestore, Firebase Cloud Messaging (FCM), BLE, Keychain, Biometric Authentication, StoreKit, In-App Purchases, XCTest, Unit Testing, UI Testing, Memory Management, Instruments, CI/CD, Git, GitHub Actions, CocoaPods, Swift Package Manager, Xcode, Code Review, SQLite, Deep Linking, App Store Connect, TestFlight, MVC, Caching, GraphQL, offline storage, Performance optimization, Custom extension, WebKit, ARKit, CoreML, Core location, Core animation, SOAP, JSON, XML, Cryptography, Bugzilla, Jira, Agile, State Management

Soft Skills: Analytical Skills, Collaborate, Data Analysis, Stakeholders, Problem Solving, Ownership

WORK EXPERIENCE

Senior Software Engineer - CryptoTech Laboratories Pvt Ltd

May 2024 - March 2026

Applications: Emdha Premium, Subscriber, RCU Digital Signature

- Architected and delivered scalable iOS applications, managing the full development lifecycle from initial design to production deployment.
- Implemented networking, security enhancements, custom UI/UX, modular architecture, and third-party libraries, achieving performance, improved stability, and ensuring iPad compatibility.
- Created a custom network Manager for API handling. Adopted architecture and design patterns like MVVM, organized project structure, and created reusable utility classes.
- Designed and implemented advanced UI components with smooth animations, pagination, deep linking, and biometric authentication (Face ID, fingerprint), delivering an improved and seamless user experience.
- Tracked and resolved Jira tickets, optimized performance, collaborated with cross-functional teams, and provided ongoing support and guidance to team members.

Software Engineer - Maadhyamik Technologies Private Limited

March 2023 – Dec 2023

Applications: Varta Keyboard, Tamil- izhai

- Owned end-to-end development and production release of multilingual iOS applications, covering architecture, feature development, testing, code reviews, App Store deployment, and production support.

- Architected and developed a custom multilingual keyboard platform supporting 9 Indian languages, implementing phonemic input, automatic script/grammar handling, vowel modifiers, halant removal, and language-specific character processing.
- Engineered advanced iOS keyboard and extension capabilities, including slide-to-type, voice input, QWERTY-compatible layouts, custom Keyboard Extensions, Safari Extensions, widgets, and system-level configuration options.
- Built scalable SwiftUI-based experiences with localization and adaptive iPhone/iPad support, integrating local data persistence and Firebase while handling system settings, user preferences, and application data management.
- Improved overall application quality and maintainability through code reviews, performance optimization, debugging, testing, production issue resolution, and reusable architecture across the Varta Keyboard and Tamil Izhai applications.

Software Engineer - OptiSol Business Solutions

May 2022 - Dec 2022

Applications: LPEM

LPEM Application provides ordering food with menu items in the school canteen by both students and parents.

- Managed the entire lifecycle of iOS app development, from conception to deployment.
- Coordinated with cross-functional teams to align app development with overall business goals.
- Bug fixes and new Feature implementation.
- Enabling and integrating Push Notifications, tracking user events.
- Upload the application into App Store and version management.

Software Engineer - Technoduces Info Solutions Pvt Ltd

Aug 2020 - May 2022

Applications: Foodline, Fit App

It is an app to set, track, and detect your health and fitness data day and night. Track your daily steps and distance along with calories burned right; Heart Rate Monitor can help monitor your heart rate to help you exercise and adjust your training plan scientifically.

- Designed and built a home automation prototype using Core Bluetooth to control smart devices via iOS.
- Designed and achieved iOS application features using Swift, UIKit, and REST APIs, ensuring high performance and reliability.
- Integrated location services, push notifications, and payment purchases to enhance user engagement and functionality.

Worked closely with product, QA, and backend teams to deliver quality releases in an Agile environment.

iOS Developer - MenThee Technologies

Jan 2020 - Aug 2020

Application: Farebuddy

FareBuddy app brings you the simplest and fastest way to take care of your hotel and flight bookings at the lowest possible fare without ever leaving the app.

- Integrated RESTful APIs, handled networking, JSON parsing, and error management.
- Implemented user-centric designs, enhanced UX and engagement.
- Pioneered adoption of Swift, enhancing code maintainability and speed.
- Collaborated with cross-functional teams to drive project success.

Education: Bachelor of Engineering, Knowledge Institute of technology
